

Ensuring perpetual access to licensed content

Symposium of the Consortium of Swiss Academic Libraries

Tuesday, 5th June 2012

Vortragssaal der Zentralbibliothek der Universitätsbibliothek Bern, Münsterstrasse 61/63, 3000 Bern ([how to get there](#))

This year's Consortium event will be dealing with the subject of perpetual access to and long-term preservation of licensed content. These issues are of great interest to libraries, as it is crucial for them to secure long-term access to the content they have paid for.

After an introduction to the main issues including the Consortium's experiences so far and international trends and projects, Portico and LOCKSS will be presenting their approaches to the issues at hand. Afterwards, the ETH-Bibliothek will refer to their own experiences with installing and operating a LOCKSS-Box and Springer will reveal a publisher's view on the whole topic and its own efforts.

MORNING

from 9.30

Welcome coffee and registration

10.15-10.30

Opening words

Jeannette Frey, Member of the Consortium's Steering Committee and Library Director, Bibliothèque cantonale et universitaire (Lausanne)
