

Open Access eBooks

ETH Main Building E 21, Rämistrasse 101, 8092 Zurich

The 3-hour workshop invites perspectives from librarians, university administration, researchers, publishers and research funders on the role of coordination and markets in securing a more open future for Swiss scholarship.

The aim of the workshop is to gain insight of how in particular:

- *The Swiss National Science Foundation explores the Open Access eBooks publication process and gathers data in order to foster Open Access*
- *A not-for-profit organisation makes a difference in moving towards free access to scholarly content in a publisher ruled market*
- *The largest independent academic publisher of open access books works with universities and libraries to continue to grow open access.*

To exchange perspectives on the challenges facing monograph publishing and to elaborate valuable cooperation, the event is not only based on presentations but also on a more interactive part, where the participants discuss and contribute with their know-how and expertise.

Monday, 19 June 2017

09:45 – 10:00
